Membership regulations and rules are being framed for enrolling all banks in the country as members so that when the nationwide payment systems are launched, all would get included on a standardized platform.

Details of Aadhaar Lookup facility for mapping Aadhaar number in Aadhaar Payment Bridge (APB) Regarding the issue of mapping Aadhaar numbers in APB (Aadhaar Payment Bridge) as provided by NPCI (National Payments Corporation of India), a facility called ‘Aadhaar Lookup’ has been introduced in the APB system. This facility would allow the members to know the status of Aadhaar mapping in the APB system and can be used for verification of a list of Aadhaar numbers through an upload process and response thereof. This would help the members to process Direct Benefits Transfer (DBT) transactions more efficiently and help reduce returns. Based on the daily APB transaction processing, it has been observed that the major reason for rejection of transaction is because Aadhaar numbers data is not uploaded to NPCI Aadhaar mapper by the member banks. Therefore, in order to reduce the rejected transactions, it is required that all Aadhaar numbers that are successfully seeded in the Bank accounts are to be uploaded on the NPCI mapper by the member Banks at the end of day on daily basis. NPCI has developed the facility of ‘Aadhaar Lookup’ to enable the member Banks to ascertain the details of Aadhaar numbers available on the NPCI mapper. Banks have been requested to arrange the access of ‘Aadhaar Lookup’ facility to their Lead District Managers (LDM) so that seeding of Aadhaar numbers to NPCI Aadhaar mapper can be ensured in up to date manner. Banks have been requested to consider issuing appropriate guidelines to their respective LDMs to start using ‘Aadhaar Lookup’ facility of NPCI to ascertain the details of Aadhaar numbers successfully seeded in Bank accounts and uploaded on NPCI mapper. The circular sent in this regards is as attached. Escalation Matrix Please find below the escalation matrix of APB Operations

Team. They can be contacted in case of any issues / clarifications, regarding APB system, Aadhaar mapping, Aadhaar Lookup facility or anything else.

CTS, the presenting bank (or its branch) captures the data (on the MICR band) and the images of a cheque using their Capture System (comprising of a scanner, core banking or other application) which is internal to them, and have to meet the specifications and standards prescribed for data and images.

To ensure security, safety and non-repudiation of data / images, end-to-end Public Key Infrastructure (PKI) has been implemented in CTS. As part of the requirement, the collecting bank (presenting bank) sends the data and captured images duly signed digitally and encrypted to the central processing location (Clearing House) for onward transmission to the paying bank (destination or drawee bank). For the purpose of participation the presenting and paying banks are provided with an interface / gateway called the Clearing House Interface (CHI) that enables them to connect and transmit data and images in a secure and safe manner to the Clearing House (CH).

The Clearing House processes the data, arrives at the settlement figure and routes the images and requisite data to the paying banks. This is called the presentation clearing. The paying banks through their CHIs receive the images and data from the Clearing House for payment processing.

The paying bank's CHIs also generate the return file for unpaid instruments, if any. The return file / data sent by the paying banks are processed by the Clearing House in the return clearing session in the same way as presentation clearing and return data is provided to the presenting banks for processing.

The clearing cycle is treated as complete once the presentation clearing and the associated return clearing sessions are successfully processed. The entire essence of CTS technology lies in the use of images of cheques (instead of the physical cheques) for payment processing.

Grid based CTS provide significant cost savings. Consolidation of clearing locations into a few grids minimise the investment in MICR machines and the related AMC costs. Banks will benefit from economies of scale as the grid CTS obviates the need for establishing inward cheque processing infrastructure at various clearing locations. With the merger of many local clearing houses with CTS grids, the settlements which were earlier spread across numerous clearing house locations have been subsumed into a single settlement, thereby significantly reducing the liquidity requirements for the banks.

CTS will also result in other benefits in terms of reduction in the cheque processing fee, reduction in operational overhead, elimination of clearing differences and reconciliation issues etc.

Images of cheques are taken using specific scanners. Scanners also function like photo-copiers by reflecting the light passed through a narrow passage on to the document. Tiny sensors measure the reflection from each point along the strip of light. Reflectance measurements of each dot are called a pixel. Images are classified as black and white, gray-scale or colour based on how the pixels are converted into digital values. For getting a gray scale image the pixels are mapped onto a range of gray shades between black and white. The entire image of the original document gets mapped as some shade of gray, lighter or darker, depending on the colour of the source. In the case of black and white images, such mapping is made only to two colours based on the range of values of contrasts. A black and white image is also called a binary image.

SUMMARY OF BUSINESS OVERVIEW

OVERVIEW

Background of the Company

Our Company was originally incorporated as “Airan Consultants Private Limited” on April 19, 1995 under the provisions of Companies Act, 1956 with a certificate of Incorporation issued by Registrar of Companies, Gujarat, Dadra and Nagar Haveli at Ahmedabad. Later on, the name of our company was changed to “Airan Private Limited” on January 4, 2017 with certificate of Incorporation pursuant to change of name issued by Registrar of Companies, Ahmedabad. Consequent upon the conversion of our Company into public limited company, the name of our Company was changed to “Airan Limited” and fresh certificate of incorporation dated January 18, 2017 was issued by the Registrar of Companies, Ahmedabad. The Corporate Identification Number of our Company is U74140GJ1995PLC025519.

The business activities of computer coaching were started way back in 1990’s by the inspiration of Late Shri Vishwanath Bhimsen Agrawal. Our promoter Mr. Sandeep Agrawal started computer coaching classes under a proprietorship firm namely ‘Arrow Computer Systems’ (“ACS”). The said first generation business entity was started with one Wipro Brand PC-XT Machine having Seagate ST225 20MB Hard Disk, a 5-1/4 inch Floppy Drive for 360 KB Capacity Double sided, Double Density Floppy Disk, Monochrome Monitor and Tactile Keyboard to provide the coaching of various courses like DOS, Basic, dBase, Lotus-123, Wordstar etc. The theoretical coaching was extended with the help of pre-recorded lectures played on a video cassette player.

Subsequently, in the second year i.e 1991-1992 the business turned its tracks to a different direction from coaching to Data Processing. In the said period the Initial Public Offer processing was carried out by the existing vendors of various public sector banks including State Bank of India and Punjab National Bank. M/s. K.D. enterprise run by Mr. Ketan Dave was principal vendor, ACS was carrying out activities under sub-contact of M/s. K.D. enterprise. Till 1993-1994, all the accumulated profits of ACS were re-invested in the business in terms of Information Technology (IT) and other Infrastructure. In 1993-94, ACS became direct IPO Processing vendor, Clearing Processing vendor (Dividend Warrants & Refund Orders) for Punjab National Bank in Ahmedabad and gradually spread its wings among various other Public Sector Banks. To give the business a corporate shape and promoted along with family members Late Shri Vishwanath Bhimsen Agrawal and Shri Sudeepkumar Vishwanath Agrawal floated our company “Airan Consultants Private Limited” was duly incorporated on April 19, 1995 and took over the data processing business of “ACS”. Since, then Mr. Sandeep Agrawal is associated as Director of the Company.

During the year 1995-2000, Our Company started full fledged IPO Applications processing, Manual clearing (**NON-MICR**) through computerised listing with 100% reconciliation, dividend warrants listing and reconciliation, refund orders listing and reconciliation for many Public Sector Banks. For manual ledgers of Savings Account / CC Accounts, Interest application through computerized calculation of interest and providing an interest application scroll for manual posting into the accounts ledgers. Maintaining Pensioners data and providing monthly Pension Payment Scroll to the Branches of State Bank of India. In addition, during the said period the IPOs were flourishing and volumes were too much, the company was formed with one of the object to apply for a Registrars to the Issue (RTI) and Share Transfer Agents (STA) license, but already there were many Registrars to the Issue (RTI) and Share Transfer Agents (STA) in Gujarat as well as across India. The companies were reluctant in following laid down norms, the RTI/STA were suffering, hence it was kept pending. While the data processing on behalf of the RTI/STA like Karvy Consultants Ltd, MCS Ltd, Compuquick Datamation Pvt. Ltd., Super Corporate Services Pvt. Ltd. and other local RTI/STA, was executed on a large scale, we could manage our major revenue generation out of the same.

Later on in the year 2000, Magnetic Ink Character Recognition (**MICR**) - Clearing system was introduced by RBI in various centers across India, and our Company was one of the leading MICR Clearing processing partner in region of Western India. In addition, introduction of Book Building IPOs doubled the processing opportunity for the company, as the IPO application forms were processed for Bidding activity first and thereafter the same were continued to be processed for Banks.

In the year 2001, our Company got the robust growth as the private sector banks started opening up and Multinational Banks spread their wings and opened up branches across India, Our Company entered into agreement with various banks like HDFC Bank Ltd, UTI Bank Ltd, Citibank N.A., and that was again a new turning point which put our company on to the fast track. In addition, Our Company initiated field operations by providing Door Step Banking on behalf of Citibank to its premium customers. This opened a new horizon for us and the field operations equaled the revenue of data processing & other IT enabled services in few years by spreading the door step banking services to various other banks and their branches in western India.

In the year 2003, our Company initiated Utility Bills Payment Processing for various utility companies and End to End (E2E) solutions for IPO Financing scheme of Centurion Bank of Punjab, both the venture diversification were proved grand success to us. The NPCI was incorporated in December 2008 and the Certificate of Commencement of Business was issued in April 2009. The authorised capital has been pegged at ₹3 billion (US\$45 million) and paid up capital is ₹600 million (US\$8.9 million).

Presently, there are ten core promoter banks (State Bank of India, Punjab National Bank, Canara Bank, Bank of Baroda, Union Bank of India, Bank of India, ICICI Bank, HDFC Bank, Citibank and HSBC). The Board consists of Balachandran.M as the chairman, Nominee from Reserve Bank of India and Nominees from ten core promoter banks. Mr. A. P. Hota is the managing director and chief executive officer of NPCI.

The Board for Regulation and Supervision of Payment and Settlement Systems (BPSS) at its meeting held on 24 September 2009 has approved in principle to issue authorisation to NPCI for operating various retail payment systems in the country and granted Certificate of Authorisation for operation of National Financial Switch (NFS) ATM Network with effect from 15 October 2009. NPCI has deputed its officials to IDRBT Hyderabad and NPCI has taken over NFS operations from 14 December 2009. Membership regulations and rules are being framed for enrolling all banks in the country as members so that when the nationwide payment systems are launched, all would get included on a standardized platform.

A Technical Advisory Committee has also been constituted with two professors of IIT Bombay. N. L. Sarda is the chairman and G. Sivakumar is the Co-Chairman of the Technical Advisory Committee. Members in these committees are drawn from banks at the level of Deputy General manager/ Assistant general manager.

The key products of NPCI are:

National Financial Switch (NFS) which connects 1,98,953 ATMs of 449 banks (91 Member Banks, 358 Sub-Member)* [4]. Immediate Payment Service (IMPS) provided to 84 member banks*, with more than 8.49 crore MMID* (Mobile Money Identifier) issued, and crossed 10 million transactions*.

National Automated Clearing House (NACH) - has close to 400 banks* on board. Aadhaar Payments Bridge System (APBS) has more than 358 banks*. Details of Aadhaar Lookup facility for mapping Aadhaar number in Aadhaar Payment Bridge (APB) Regarding the issue of mapping Aadhaar numbers in APB (Aadhaar Payment Bridge) as provided by NPCI (National Payments Corporation of India), a facility called 'Aadhaar Lookup' has been introduced in the APB system. This facility would allow the members to know the status of Aadhaar mapping in the APB system and can be used for verification of a list of Aadhaar numbers through an upload process and response thereof. This would help the members to process Direct Benefits Transfer (DBT) transactions more efficiently and help reduce returns. Based on the daily APB transaction processing, it has been observed that the major reason for rejection of transaction is because Aadhaar numbers data is not uploaded to NPCI Aadhaar mapper by the member banks. Therefore, in order to reduce the rejected transactions, it is required that all Aadhaar numbers that are successfully seeded in the Bank accounts are to be uploaded on the NPCI mapper by the member Banks at the end of day on daily basis. NPCI has developed the facility of 'Aadhaar Lookup' to enable the member Banks to ascertain the details of Aadhaar numbers available on the NPCI mapper. Banks have been requested to arrange the access of 'Aadhaar Lookup' facility to their Lead District Managers (LDM) so that seeding of Aadhaar numbers to NPCI Aadhaar mapper can be ensured in up to date manner. Banks have been requested to consider issuing appropriate guidelines to their respective LDMs to start using 'Aadhaar Lookup' facility of NPCI to ascertain the details of Aadhaar numbers successfully seeded in Bank accounts and uploaded on NPCI mapper. The circular sent in this regards is as attached. Escalation Matrix Please find below the escalation matrix of APB Operations Team. They can be contacted in case of any issues / clarifications, regarding APB system, Aadhaar mapping, Aadhaar Lookup facility or anything else.

CTS, the presenting bank (or its branch) captures the data (on the MICR band) and the images of a cheque using their Capture System (comprising of a scanner, core banking or other application) which is internal to them, and have to meet the specifications and standards prescribed for data and images.

To ensure security, safety and non-repudiation of data / images, end-to-end Public Key Infrastructure (PKI) has been implemented in CTS. As part of the requirement, the collecting bank (presenting bank) sends the data and captured images duly signed digitally and encrypted to the central processing location (Clearing House) for onward transmission to the paying bank (destination or drawee bank). For the purpose of participation the presenting and paying banks are provided with an interface / gateway called the Clearing House Interface (CHI) that enables them to connect and transmit data and images in a secure and safe manner to the Clearing House (CH).

The Clearing House processes the data, arrives at the settlement figure and routes the images and requisite data to the paying banks. This is called the presentation clearing. The paying banks through their CHIs receive the images and data from the Clearing House for payment processing.

The paying bank's CHIs also generate the return file for unpaid instruments, if any. The return file / data sent by the paying banks are processed by the Clearing House in the return clearing session in the same way as presentation clearing and return data is provided to the presenting banks for processing.

The clearing cycle is treated as complete once the presentation clearing and the associated return clearing sessions are successfully processed. The entire essence of CTS technology lies in the use of images of cheques (instead of the physical cheques) for payment processing.

Grid based CTS provide significant cost savings. Consolidation of clearing locations into a few grids minimise the investment in MICR machines and the related AMC costs. Banks will benefit from economies of scale as the grid CTS obviates the need for establishing inward cheque processing infrastructure at various clearing locations. With the merger of many local clearing houses with CTS grids, the settlements which were earlier spread across numerous clearing house locations have been subsumed into a single settlement, thereby significantly reducing the liquidity requirements for the banks.

CTS will also result in other benefits in terms of reduction in the cheque processing fee, reduction in operational overhead, elimination of clearing differences and reconciliation issues etc.

Images of cheques are taken using specific scanners. Scanners also function like photo-copiers by reflecting the light passed through a narrow passage on to the document. Tiny sensors measure the reflection from each point along the strip of light. Reflectance measurements of each dot are called a pixel. Images are classified as black and white, gray-scale or colour

based on how the pixels are converted into digital values. For getting a gray scale image the pixels are mapped onto a range of gray shades between black and white. The entire image of the original document gets mapped as some shade of gray, lighter or darker, depending on the colour of the source. In the case of black and white images, such mapping is made only to two colours based on the range of values of contrasts. A black and white image is also called a binary image.

The prescription on prohibiting alterations / corrections on cheques has been introduced to curtail cheque related frauds. No changes / corrections can be carried out on the cheques (other than for date validation purposes, if required). For any change in the payee's name, courtesy amount (amount in figures) or legal amount (amount in words), fresh cheque leaves should be used by customers. This would help banks in identifying and controlling fraudulent alterations. This prohibition is applicable to cheques cleared under the image based Cheque Truncation System (CTS) only. It is not applicable to cheques cleared under physical exchange of instruments.

OVERVIEW

Background of the Company

Our Company was originally incorporated as “Airan Consultants Private Limited” on April 19, 1995 under the provisions of Companies Act, 1956 with a certificate of Incorporation issued by Registrar of Companies, Gujarat, Dadra and Nagar Haveli at Ahmedabad. Later on, the name of our company was changed to “Airan Private Limited” on January 4, 2017 with certificate of Incorporation pursuant to change of name issued by Registrar of Companies, Ahmedabad. Consequent upon the conversion of our Company into public limited company, the name of our Company was changed to “Airan Limited” and fresh certificate of incorporation dated January 18, 2017 was issued by the Registrar of Companies, Ahmedabad. The Corporate Identification Number of our Company is U74140GJ1995PLC025519.

The business activities of computer coaching were started way back in 1990’s by the inspiration of Late Shri Vishwanath Bhimsen Agrawal. Our promoter Mr. Sandeep Agrawal started computer coaching classes under a proprietorship firm namely ‘Arrow Computer Systems’ (“ACS”). The said first generation business entity was started with one Wipro Brand PC-XT Machine having Seagate ST225 20MB Hard Disk, a 5-1/4 inch Floppy Drive for 360 KB Capacity Double sided, Double Density Floppy Disk, Monochrome Monitor and Tactile Keyboard to provide the coaching of various courses like DOS, Basic, dBase, Lotus-123, Wordstar etc. The theoretical coaching was extended with the help of pre-recorded lectures played on a video cassette player.

Subsequently, in the second year i.e 1991-1992 the business turned its tracks to a different direction from coaching to Data Processing. In the said period the Initial Public Offer processing was carried out by the existing vendors of various public sector banks including State Bank of India and Punjab National Bank. M/s. K.D. enterprise run by Mr. Ketan Dave was principal vendor, ACS was carrying out activities under sub-contact of M/s. K.D. enterprise. Till 1993-1994, all the accumulated profits of ACS were re-invested in the business in terms of Information Technology (IT) and other Infrastructure. In 1993-94, ACS became direct IPO Processing vendor, Clearing Processing vendor (Dividend Warrants & Refund Orders) for Punjab National Bank in Ahmedabad and gradually spread its wings among various other Public Sector Banks. To give the business a corporate shape and promoted along with family members Late Shri Vishwanath Bhimsen Agrawal and Shri Sudeepkumar Vishwanath Agrawal floated our company “Airan Consultants Private Limited” was duly incorporated on April 19, 1995 and took over the data processing business of “ACS”. Since, then Mr. Sandeep Agrawal is associated as Director of the Company.

During the year 1995-2000, Our Company started full fledged IPO Applications processing, Manual clearing (**NON-MICR**) through computerised listing with 100% reconciliation, dividend warrants listing and reconciliation, refund orders listing and reconciliation for many Public Sector Banks. For manual ledgers of Savings Account / CC Accounts, Interest application through computerized calculation of interest and providing an interest application scroll for manual posting into the accounts ledgers. Maintaining Pensioners data and providing monthly Pension Payment Scroll to the Branches of State Bank of India. In addition, during the said period the IPOs were flourishing and volumes were too much, the company was formed with one of the object to apply for a Registrars to the Issue (RTI) and Share Transfer Agents (STA) license, but already there were many Registrars to the Issue (RTI) and Share Transfer Agents (STA) in Gujarat as well as across India. The companies were reluctant in following laid down norms, the RTI/STA were suffering, hence it was kept pending. While the data processing on behalf of the RTI/STA like Karvy Consultants Ltd, MCS Ltd, Compuquick Datamation Pvt. Ltd., Super Corporate Services Pvt. Ltd. and other local RTI/STA, was executed on a large scale, we could manage our major revenue generation out of the same.

Western India. In addition, introduction of Book Building IPOs doubled the processing opportunity for the company, as the IPO application forms were processed for Bidding activity first and thereafter the same were continued to be processed for Banks.

This opened a new horizon for us and the field operations equaled the revenue of data processing & other IT enabled services in few years by spreading the door step banking services to various other banks and their branches in western India.

In the year 2003, our Company initiated Utility Bills Payment Processing for various utility companies and End to End (E2E) solutions for IPO Financing scheme of Centurion Bank of Punjab, both the venture diversification were proved grand success to us. The utility bills payment processing is being continued for almost all the utility bill generating companies like, Electricity, Telephone, Mobility, Internet Services, Piped Natural Gas (PNG), Civic Services by Municipal Corporation.

The Magnetic Ink Character Recognition (MICR) Clearing operations were started for Citibank NA, across western India which later converted in to Image based Cheque Truncation System (CTS) after the Reserve Bank of India's Directions and after functioning of National Payment Corporation of India (NPCI). The Cheque Truncation System (CTS) Platform of clearing opened new horizons wherein the entire volume of an NPCI's grid can be processed at one location, wherein the volumes increased and the virtual territorial expansion took place and hence new clients were added in to our Kitty.

After establishing the strong foothold in the field of IT and IT enabled services related to banking transaction, cash management services and document management services our company in the year 2014, started providing services to the company which are engaged in the field of Telecom and Internet Service Provider (ISP) which was new vertical for our company, but certainly a volume generating activity, wherein the (End to End) E2E process, right from Know Your Customer (KYC) spot audit / pickup of forms from the distributor's point, thorough Know Your Client (KYC) audit at nearest spoke office, data entry of application form in to the online portal, opening an account, verifying the voter ID / Aadhaar number from their web portal, and activating the SIM of the customer in a limited Turn Around Time (TAT), outward from spoke, transporting forms to the centralised HUB, inward at HUB, Bar Coding, Gumming Photograph, De-stapling, Scanning, Re-stapling, Image Splitting, File Naming, Batch preparing up to final warehousing.

Further, Know Your Customer (KYC) is the biggest focus point among all the utility services providers including payment banks like PayTM & Airtel Money. Cash Management Services (CMS)

AIRAN collects cheque from almost 10,000 Points from prominent clients of Banks and Bank branches on daily basis across India and its still increasing. We provide privileged services like Door step banking to elite customers of Banks since its inception.

We have developed robust mechanism for collection of cheque over the time by developing technology and evolving from time to time. Today we have developed Mobile application (QR code reader) to track the Feet-on-street (FOS) and daily collection report online.

Our FOS collects cheques from the CMS Clients of Bank and deposit the same at the designated nearest CMS enabled bank branch before clearing cut-off time. It's a real sensitive activity in nature, where we have met the timelines without fail since past two decades ensuring customer satisfaction. Daily reporting is done to banks through MIS in prescribed format.

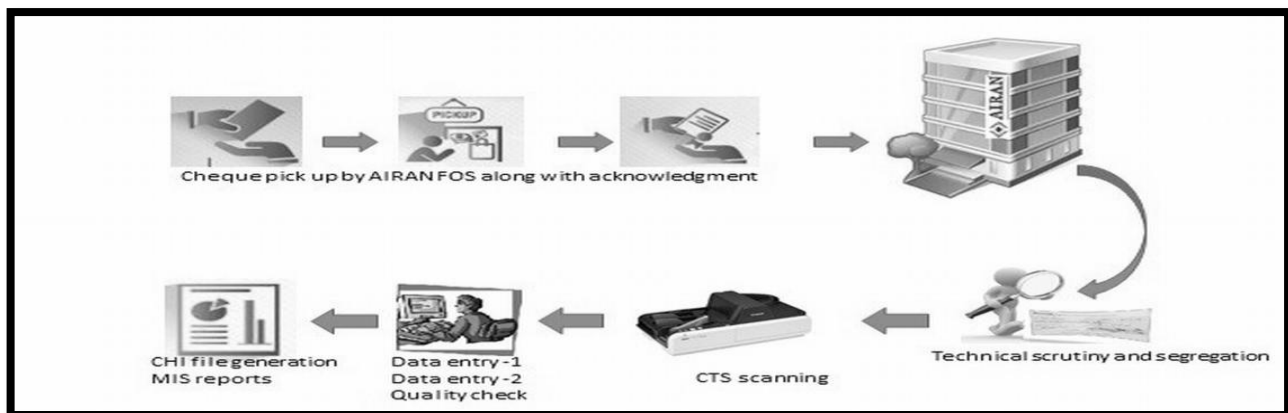

We are also pioneered in Drop box clearance on designated time and deposit the cheques at the designated nearest CMS enabled branch. We also carry out Coordination Activities where presently the respective Bank Branch is not available. In such places the Bank has an arrangement with few other Banks to carry out the CMS activity.

Cash Management Services (CMS) – Cheque processing

Cheque Truncation System (CTS) is an online imaged based cheque clearing system, wherein the image of the cheque and MICR data is captured at the collecting bank and transmitted electronically eliminating the actual cheque movement.

During MICR and NON MICR processing we have provided robust solutions to Banking and Financial segments. Then came CTS in 2014 and since inception of CTS, AIRAN has provided end to end customized software solutions of processing cheques to several Banks and Financial institutions as per their requirements.

We have developed several online and offline modules based on requirements and are successfully deployed at operational level. Today we carry out CTS clearing for prominent banks and financial segments across India with strong base in Western Grid. We are the only service partner in Gujarat who is catering services to almost every Bank and Financial sector.

- Step 2.** Technical scrutiny, Segregation, UV check
- Step 3.** CTS scanning
- Step 4.** Data processing

Outward Clearing Module

There are two modules for O/W clearing

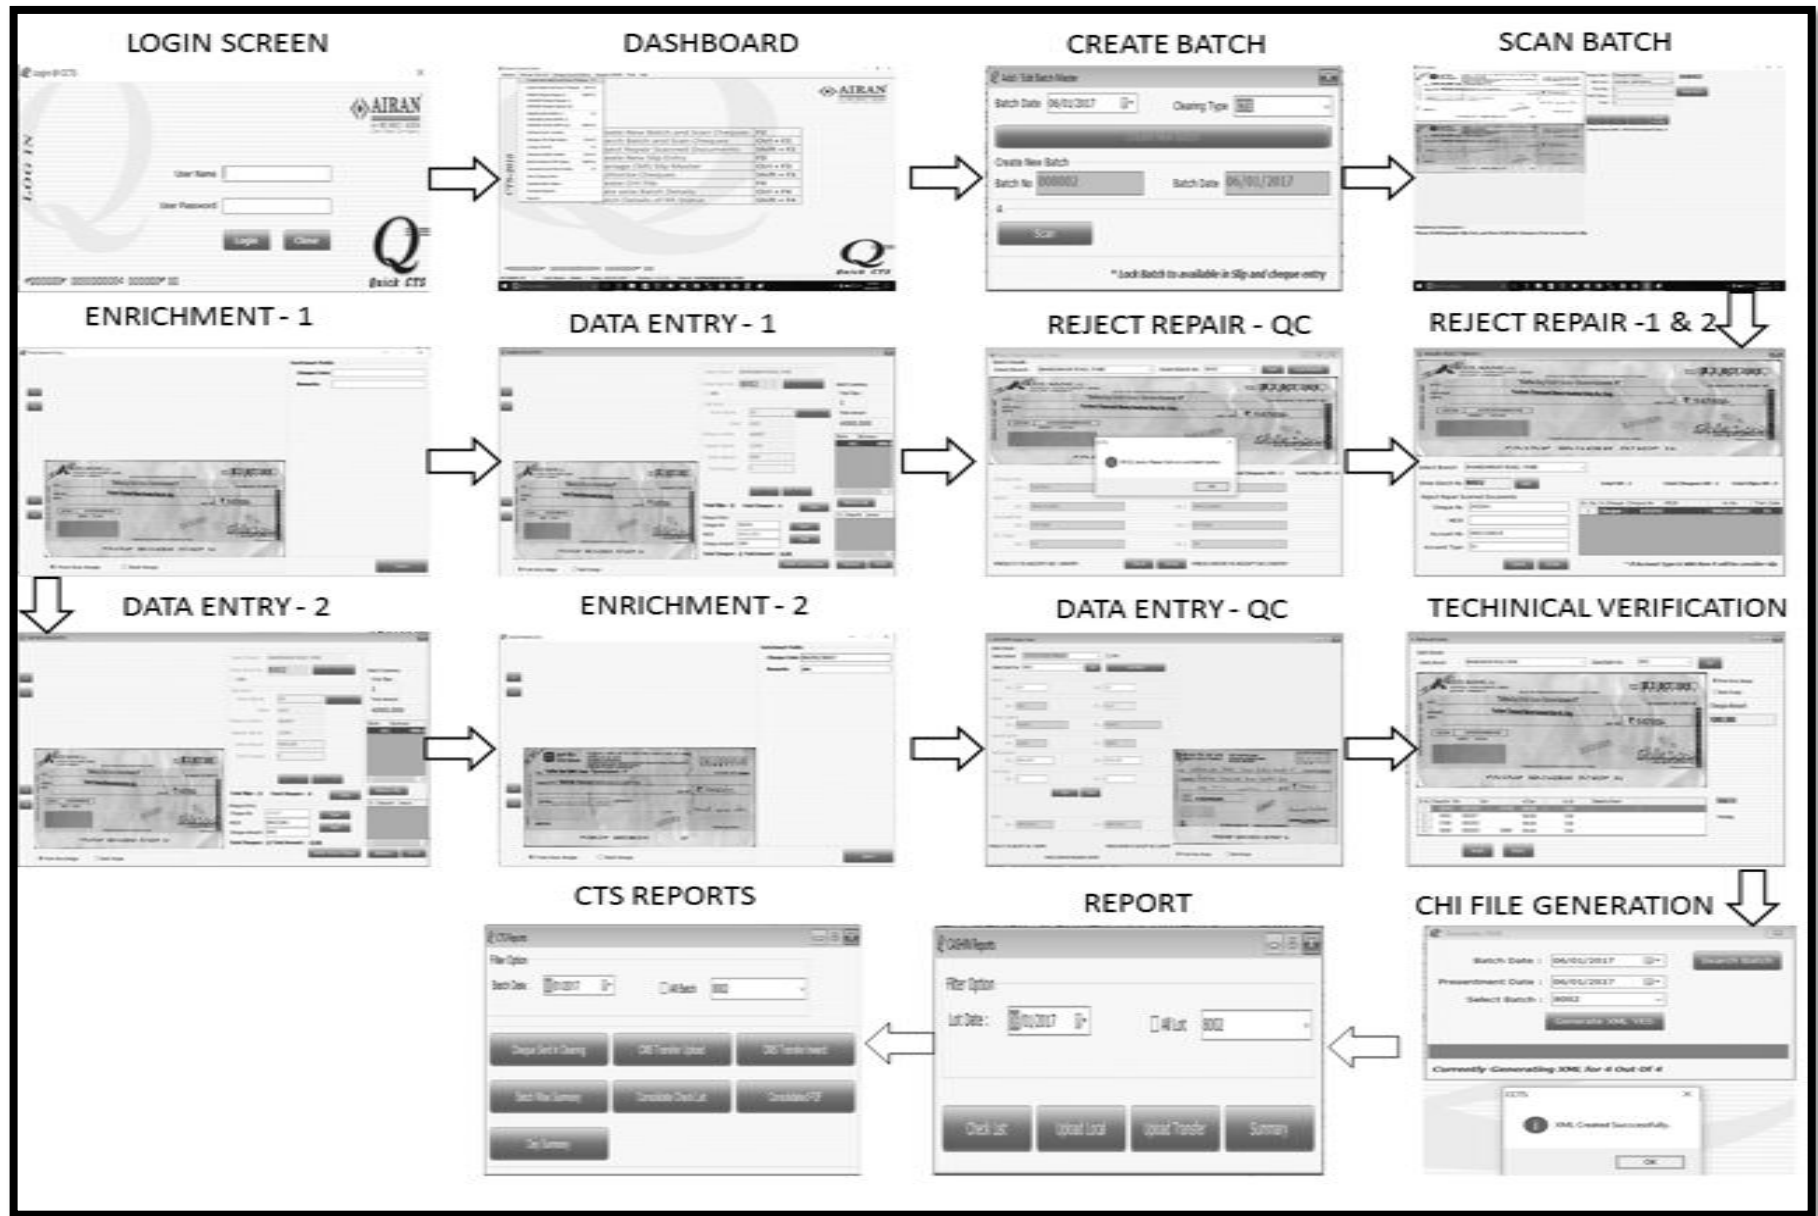

1. Online (Centralized)
2. Offline (Decentralized)

Customer deposits their cheque in bank branches or is given privilege pick up services which are collected and processed by AIRAN at its Centralized or Decentralized location. AIRAN FOS collects cheques and delivers at AIRAN office according to cut off time stated by the Bank and Financial institutions. At AIRAN we carry out Technical scrutiny, Audit, UV (Ultraviolet check machine) and segregation of the instruments. The Technical scrutiny is being done as per the RBI guidelines.

Instruments are scanned in high speed scanners (Canon CR 190i) with latest technology developed by AIRAN. Further the images are being uploaded in AIRAN software modules for Detail entry which includes capturing demographic details. The detail capturing has to be 100% error free as there is no scope of any miss out as it directly impacts the Bank and the customer. The trained professional staff at AIRAN does the detailed entry in system and to ensure 100% quality it's being done through Maker – Checker concept along with Quality check. AIRAN has built such high standards which are visible in the service delivery given to client. AIRAN systems and software are capable of working from any location across India.

Business Overview

Our Company was originally incorporated as "Airan Consultants Private Limited" on April 19, 1995 under the provisions of Companies Act, 1956 with a certificate of Incorporation issued by Registrar of Companies, Gujarat, Dadra and Nagar Haveli at Ahmedabad. Later on, the name of our company was changed to "Airan Private Limited" on January 4, 2017 with certificate of Incorporation pursuant to change of name issued by Registrar of Companies, Ahmedabad. Consequent upon the conversion of our Company into public limited company, the name of our Company was changed to "Airan Limited" and fresh certificate of incorporation dated January 18, 2017 was issued by the Registrar of Companies, Ahmedabad. The Corporate Identification Number of our Company is U74140GJ1995PLC025519.

The business activities of computer coaching were started way back in 1990's by the inspiration of Late Shri Vishwanath Bhimsen Agrawal. Our promoter Mr. Sandeep Agrawal started computer coaching classes under a proprietorship firm namely 'Arrow Computer Systems' ("ACS"). The said first generation business entity was started with one Wipro Brand PC-XT Machine having Seagate ST225 20MB Hard Disk, a 5-1/4 inch Floppy Drive for 360 KB Capacity Double sided, Double Density Floppy Disk, Monochrome Monitor and Tactile Keyboard to provide the coaching of various courses like DOS, Basic, dBase, Lotus-123, Wordstar etc. The theoretical coaching was extended with the help of pre-recorded lectures played on a video cassette player.

Subsequently, in the second year i.e 1991-1992 the business turned its tracks to a different direction from coaching to Data Processing. In the said period the Initial Public Offer processing was carried out by the existing vendors of various public sector banks including State Bank of India and Punjab National Bank. M/s. K.D. enterprise run by Mr. Ketan Dave was principal vendor, ACS was carrying out activities under sub-contact of M/s. K.D. enterprise. Till 1993-1994, all the accumulated profits of ACS were re-invested in the business in terms of Information Technology (IT) and other Infrastructure. In 1993-94, ACS became direct IPO Processing vendor, Clearing Processing vendor (Dividend Warrants & Refund Orders) for Punjab National Bank in Ahmedabad and gradually spread its wings among various other Public Sector Banks. To give the business a corporate shape and promoted along with family members Late Shri Vishwanath Bhimsen Agrawal and Shri Sudeepkumar Vishwanath Agrawal floated our company "Airan Consultants Private Limited" was duly incorporated on April 19, 1995 and took over the data processing business of "ACS". Since, then Mr. Sandeep Agrawal is associated as Director of the Company.

During the year 1995-2000, Our Company started full fledged IPO Applications processing, Manual clearing (**NON-MICR**) through computerised listing with 100% reconciliation, dividend warrants listing and reconciliation, refund orders listing and reconciliation for many Public Sector Banks. For manual ledgers of Savings Account / CC Accounts, Interest application through computerized calculation of interest and providing an interest application scroll for manual posting into the accounts ledgers. Maintaining Pensioners data and providing monthly Pension Payment Scroll to the Branches of State Bank of India. In addition, during the said period the IPOs were flourishing and volumes were too much, the company was formed with one of the object to apply for a Registrars to the Issue (RTI) and Share Transfer Agents (STA) license, but already there were many Registrars to the Issue (RTI) and Share Transfer Agents (STA) in Gujarat as well as across India. The companies were reluctant in following laid down norms, the RTI/STA were suffering, hence it was kept pending. While the data processing on behalf of the RTI/STA like Karvy Consultants Ltd, MCS Ltd, Compuquick Datamation Pvt. Ltd., Super Corporate Services Pvt. Ltd. and other local RTI/STA, was executed on a large scale, we could manage our major revenue generation out of the same.

Later on in the year 2000, Magnetic Ink Character Recognition (**MICR**) - Clearing system was introduced by RBI in various centers across India, and our Company was one of the leading MICR Clearing processing partner in region of Western India. In addition, introduction of Book Building IPOs doubled the processing opportunity for the company, as the

IPO application forms were processed for Bidding activity first and thereafter the same were continued to be processed for Banks.

In the year 2001, our Company got the robust growth as the private sector banks started opening up and Multinational Banks spread their wings and opened up branches across India, Our Company entered into agreement with various banks like HDFC Bank Ltd, UTI Bank Ltd, Citibank N.A., and that was again a new turning point which put our company on to the fast track. In addition, Our Company initiated field operations by providing Door Step Banking on behalf of Citibank to its premium customers. This opened a new horizon for us and the field operations equaled the revenue of data processing & other IT enabled services in few years by spreading the door step banking services to various other banks and their branches in western India.

In the year 2003, our Company initiated Utility Bills Payment Processing for various utility companies and End to End (E2E) solutions for IPO Financing scheme of Centurion Bank of Punjab, both the venture diversification were proved grand success to us. The utility bills payment processing is being continued for almost all the utility bill generating companies like, Electricity, Telephone, Mobility, Internet Services, Piped Natural Gas (PNG), Civic Services by Municipal Corporation.

During the year 2004-2014, Our Company have been appointed as sole co-ordinators for locations in Gujarat & Rajasthan State for Cash Management Services (CMS) operations of various banks including Standard Chartered Bank, Deutsche Bank, ICICI Bank Ltd., IDBI Bank Ltd., Indusind Bank Ltd., Kotak Mahindra Bank Ltd, Barclays Bank, Bank of America, Citibank NA, HSBC, Royal Bank of Scotland RBS, Union Bank of India, HDFC Bank Ltd, Axis Bank Ltd., RBL Ratnakar Bank Ltd, Yes Bank Ltd. Etc and also providing services related to clearing operations for Citibank NA across their 9 locations in Western India. The Magnetic Ink Character Recognition (MICR) Clearing operations were started for Citibank NA, across western India which later converted in to Image based Cheque Truncation System (CTS) after the Reserve Bank of India's Directions and after functioning of National Payment Corporation of India (NPCI). The Cheque Truncation System (CTS) Platform of clearing opened new horizons wherein the entire volume of an NPCI's grid can be processed at one location, wherein the volumes increased and the virtual territorial expansion took place and hence new clients were added in to our Kitty.

After establishing the strong foothold in the field of IT and IT enabled services related to banking transaction, cash management services and document management services our company in the year 2014, started providing services to the company which are engaged in the field of Telecom and Internet Service Provider (ISP) which was new vertical for our company, but certainly a volume generating activity, wherein the (End to End) E2E process, right from Know Your Customer (KYC) spot audit / pickup of forms from the distributor's point, thorough Know Your Client (KYC) audit at nearest spoke office, data entry of application form in to the online portal, opening an account, verifying the voter ID / Aadhaar number from their web portal, and activating the SIM of the customer in a limited Turn Around Time (TAT), outward from spoke, transporting forms to the centralised HUB, inward at HUB, Bar Coding, Gumming Photograph, De-stapling, Scanning, Re-stapling, Image Splitting, File Naming, Batch preparing up to final warehousing.

Further, Know Your Customer (KYC) is the biggest focus point among all the utility services providers including payment banks like PayTM & Airtel Money.
