# Notes to the Financial Statements

## AIRAN AUSTRALIA PTY LTD For the year ended 31 March 2025

### Note 1. Summary of Significant accounting policies

The principal accounting policies adopted in the preparation of the financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

#### Basis of preparation

In the director's opinion, the company is not a reporting entity because there are no users dependent on general purpose financial statements. These are special purpose financial statements. The directors have determined that the accounting policies adopted are appropriate to meet the needs of the directors.

The financial statements have been prepared under the historical cost convention and do not take into account changing monetary values. The accrual and going concern assumption basis have been adopted.

#### Revenue recognition

Sales revenue is recognised at the point of sale. Amounts disclosed as revenue are net of returns and discounts.

Other revenue is recognised when it is received or when the right to receive payment is established.

#### Trade receivables

All trade receivables are recognised at the amounts received as they are generally due for settlement within 30 days.

Collectability of trade receivables is reviewed on an ongoing basis. Debts which are known to be uncollectable are written off. A provision for impairment of trade receivables is raised when some doubt as to collection exists and in any event when the debt is more than 90 days overdue.

#### Inventories

Inventory is stated at the lower of cost and net realisable value. Cost comprises purchase and delivery costs, net of rebates and discounts received or receivable.

#### Depreciation of property, plant and equipment

Depreciation is either calculated using either small business entity pooling, low value pooling or using traditional straight line or diminishing value methods.

## Leases

A distinction is made between finance leases, which effectively transfer from the lessor to the lessee substantially all the risks and benefits incidental to ownership of leased assets, and operating leases, under which the lessor effectively retains substantially all such risks and benefits.

Finance leases are capitalised. A lease asset and liability are established at the present value of minimum lease payments. Lease payments are allocated between the principal component of the lease liability and the finance costs, so as to achieve a constant rate of interest on the remaining balance of the liability.

Leased assets acquired under a finance lease is depreciated over the assets useful life or over the shorter of the assets useful life and the lease term if there is no reasonable certainty that the entity will obtain ownership at the end of the lease term.

Operating lease payments, net of any incentives received from the lessor, are charged to profit or loss on a straight-line basis over the term of the lease.

## Intangible assets

### *Research and development*

Research costs are expensed in the period in which they are incurred. Development costs are capitalised when it is probable that the project will be a success considering its commercial and technical feasibility; the entity is able to use or sell the asset; the entity has sufficient resources; and intent to complete the development and its costs can be measured reliably. Capitalised development costs are amortised on a straight-line basis over the period of their expected benefit.

### *Website*

Significant costs associated with website costs are deferred and amortised on a straight-line basis over the period of their expected benefit.

## Trade and other payables

These amounts represent liabilities for goods and services provided to the entity prior to the end of the financial year and which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition.

## Borrowings

Loans are carried at their principal amounts which represent the present value of future cash flows associated with servicing the debt. Interest is accrued over the period it becomes due and is recorded as part of current payables.

## Finance Costs

Finance costs are expensed in the period in which they are incurred. Finance costs include interest on:

- the bank overdraft
- short term and long term borrowings
- finance leases

### Provisions

Provisions are recognised when the entity has a present (legal or constructive) obligation as a result of a past event, it is probably that the entity will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date, taking into account the risks and uncertainties surrounding the obligation.
